

COMP280: Specialisms in Creative Computing

Learning outcomes

- Implement a basic procedural mesh
- ► Implement some basic primitives
- Manipulate geometry in shaders

Exercise 1 - Geometry

- Download one of the following projects
 - ► Unity https://github.com/Falmouth-Games-Academy/
 COMP280-Unity-Mesh-Example
 - ► UE4 https://github.com/Falmouth-Games-Academy/
 COMP280-UE4-Mesh-Example
- 2. Instead of the triangle, implement the following primitives
 - 2.1 Plane
 - 2.2 Pyramid
 - 2.3 Sphere
 - 2.4 Cylinder

Exercise 2 - Manipulation

- Manipulate the vertices over time, perhaps using a sine wave
- Use one of the other vertex element to dampen or expand the effect
- 3. Use one of the other vertex elements to implement vertex animation
