Workshop 3: Controls and Legal frameworks for Cybersecurity

- Workshop Session
  - **Manage** the massive backlog of articles between the group
  - **Analyse** each article
  - **Determine & cluster** related articles together
  - **Write** findings for the wiki

- Manage the massive backlog of articles between the group
  - The wiki contains about 100 articles
  - Split them between yourselves, in a way that makes sense

- Analyse each article
  - Use 5Ws&H and 3A to write notes for each article
  - Make sure everyone contributes to this activity, it's part of the basic competency threshold criteria

- Determine & cluster related articles together
  - As a group, determine how the articles cluster together
  - Apply clustering appropriately to the articles

- Write findings for the wiki
  - Update the wiki such that:
    - The wiki will be useful for your cybersecurity essay writing
    - Each article has its own page and link
    - Articles are clustered accordingly
    - Cluster definitions have a description and some appropriate narrative

- Questions
